- High Motivation
- Analytical Thinking

SUMMARY

Frontend Developer with a strong passion for building modern, responsive, and user-centered web interfaces. Experienced in working with modern JavaScript, React ecosystem, and contemporary frontend

Developed multiple frontend projects as part of hands-on learning and

WORK EXPERIENCE

Developed multiple frontend projects as part of hands-on learning and portfolio building, focusing on modern UI development, component-based architecture, and real-world application patterns using React and modern JavaScript.

McDonald's-Style Ordering Website

- Designed and developed a responsive food ordering interface inspired by modern fast-food ordering systems. The project focuses on intuitive UI,
- Built a complete e-commerce frontend including both the client-side shopping interface and an administrative dashboard for managing products and content.

COURSE

React Development Course – Maktab Sharif

Completed a professional frontend development program focused on modern JavaScript and the React ecosystem. The course covered core React concepts, component architecture, hooks, state management, and building real-world frontend applications with modern development tools.
